ABSTRACTED-PUB-NO: JP2003303198A

BASIC-ABSTRACT:

NOVELTY - The document information is collected by referring to an

origin
uniform resource locator (URL) in a result file (204), and each link to follow
the origin URL. If an error is generated during collection state, the information is re- collected with respect to URL in which error is generated,
when the content does not exist in a configuration file (206).

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for information
collecting system.

USE - For collecting document information through internet, for information
management system.

ADVANTAGE - The text file of various kinds, with different file formats, is
effectively collected.

DESCRIPTION OF DRAWING(S) - The figure shows the block diagram of the
information collecting system. (Drawing includes non-English language text).
